

TINY HOUSE WORKSHOP

Offered on two dates:

April 13-14, 2019 & October 12-13, 2019

ABOUT

After teaching over 1,000 people in person, I've designed this workshop to give you the critical information to make your tiny house dream a reality. To date over 300 tiny homes have been built through my instruction.

This workshop is a small class setting focusing on tiny house design, building and living in a tiny house. Day one will be focused on the design process. We'll start by orienting you to your goals, teach you the core design skills you'll need and even get pen to paper with your own design for live feedback from a tiny house expert.

Day two will be focused on taking your design and putting it into practice. Learn the building process from start to finish, even if you've never built anything before. This workshop is designed for the total beginner to make sure you know the key steps to building a tiny house, gain understanding around the building science to make a well built home and how to avoid common mistakes to make sure you build a home that is both safe and beautiful.

WHO THIS IS FOR & WHO IT ISN'T

This workshop is designed for those who want to build their own tiny house and are total beginners with construction or home building. People who are thinking about having a tiny house built for them by a builder will greatly benefit from this as the first day focuses on the design process and then give you the knowledge to make sure your builder is crafting your home correctly.

Expert builders will find this workshop to focus on the foundational knowledge so it might not be a good fit if you already have that knowledge.

THE SPEAKER

I will be presenting the majority of the workshop, coming from close to a decade of teaching people on how to build their own tiny house. I'm the author of the number one selling tiny house book: *Tiny House Living* and have been featured on NYT, NPR, BBC, and hundreds of other news outlets for my work in the tiny house movement. My personal background comes from me building my own house, which I live in full time for over 5 years. Having presented to thousands at events over the year and teaching millions of people each year through my website, I bring a large set of knowledge to the table to help you in your journey.

SCHEDULE

SATURDAY

9am – Welcome and introductions
9:30am – Goal setting and prioritization

OTHER DETAILS

Where and when is this event being held?

This event will be held at in Charlotte, NC at a venue called Advent Coworking 933 Louise Ave Charlotte NC. The spring event will start on Saturday the 13th of April from 9am to 5pm and Sunday the 14th of April from 10am to 5pm. The fall event will start on Saturday the 12th of October from 9am to 5pm and Sunday the 13th of October from 10am to 5pm. Free parking is available on site, limited public transportation access but it is possible. This session will be in a class room setting.

What is the cost to attend and are there age requirements?

The workshop cost \$399 per person. The workshop will be a small size to make sure I can give direct one on one feedback and answer all your questions. Attendees must be over 16 years of age.

What is the refund policy?

Once a ticket has been purchased all sales are final because we have to sign contracts for the room. We do allow for people to defer their ticket up to one year, this means if you have an emergency and can't make it, you can attend another session with your ticket.

Where do I get my ticket to the event?

We don't have actual printed tickets, we maintain a verified list of who's coming and will check you in at the event.

What if I have never used tools before or haven't built anything?

Then you found the right place, you're exactly who this workshop is designed for. I take a complex subject and break it down in simple terms that average people can understand.

Will I get to see a tiny house?

Since this is a workshop we will not be having any tiny houses on site, this is a class room workshop. I will try to arrange a tour of one where possible, but it should be understood that this would be a bonus, not a guarantee.
